January Program Glass Fusing Workshop by Lori Barry

Learn how to handle, prepare and cut glass to create your own 4" fused dish similar to the one depicted below or a 4" nightlight. Lori will explain the glass fusing process from the type of glass and cutting supplies needed all the way through the kiln temperature schedule. Students will be able to use their own creativity to create their project. Inspirational examples will be brought to class. Projects will be taken to be fired and available for pick-up at the February meeting.
